

NEW YORK STATE

Cleaning and Disinfection Guidelines

This document is brought to you by Virox™ ProBeauty. Review your state regulations below and learn how Rejuvenate™ disinfectants can help you achieve compliance.

Cleaning, Disinfection or Sterilization of Implements and Tools*

- ◆ Disinfectants used for reprocessing implements (tools) must be registered by the Environmental Protection Agency (EPA) as a “hospital grade disinfectant”.
- ◆ EPA approved hospital grade disinfectants must be used in accordance with the manufacturers’ directions for the intended implement or surface.

Reprocessing Standards*

- ◆ Finger bowls, pedicure bowls and foot baths must be cleaned, rinsed and disinfected after each client use.
- ◆ After each client use, combs, brushes and other implements that are used on hair shall be cleaned with warm water and detergent to remove debris, rinsed, dried and immersed in an EPA hospital grade disinfectant for 10 minutes or more. Then removed, rinsed, dried and stored in a drawer or covered container (marked “Disinfected”).
- ◆ After each client use, electric razor heads, cuticle scissors, and other implements which may abrade or clip superficial layers of skin shall be cleaned with water and detergent, rinsed, dried, and immersed in an EPA approved hospital grade disinfectant in accordance with manufacturers’ recommendations for no less than 10 minutes. Following disinfection, the implement shall be rinsed, dried, and stored in a drawer or covered container (marked “Disinfected”).
- ◆ Implements that are intended to penetrate skin or enter pores shall be either single use disposable or subject to sterilization.
- ◆ Implements requiring sterilization shall be autoclaved or immersed for no less than 10 hours in a chemical sterilant registered by the EPA.

Rejuvenate™ Products Help Get You Inspection Ready

- ◆ Rejuvenate™ Ready-to-Use Spray and Wipes are EPA registered Hospital Level Disinfectants.
- ◆ Rejuvenate™ Ready-to-Use Spray and Wipes are ideal for work stations and non-circulating (pipeless) foot baths.
- ◆ Rejuvenate™ Concentrate is perfect for circulating foot baths.
- ◆ Prevention™ HLD8 is an FDA registered High Level Disinfectant solution for reprocessing semi-critical devices such as cuticle scissors and pushers, nail clippers, metal foot files, etc.
- ◆ Product information and how-to-use Protocols sheets can be found at: ViroxProBeauty.com
